

Permission for erecting NW signs on a street lamp

This is now a one-stop shop procedure!

A request needs to be sent via the following link:

<https://roadenquiries.hants.gov.uk/roadproblems/highwaymanagement/generalenquiry.aspx>

This is a generic form that when submitted goes to the Highways Operation Centre who will deal with the request. They will notify the relevant local highway office.

If street lighting furniture is involved then it will automatically be passed to SSE Lighting Services through the tpa@ssecontracting.com link who will authorise and record the sign position.

If the sign is removed please advise them through the https link as above.

Fixing NW signs to lamp columns

1. Notices over a verge or footpath must be at least 2.1m to the bottom edge and the highest point no greater than 3.6m
2. Any part of the notice must be at least 0.5m from the edge of the carriageway.
3. On lamp columns, the paint and metalwork must be protected from damage by the sign or fixings by using a rubber or similar band.
4. The sign must not obscure the column maintenance number or any other official markings.
5. The sign must be kept in good order. Damaged or defaced signs must be repaired, removed or replaced without delay.
6. Do not lean a ladder against the column but use a free standing step ladder for access.
